Response to Amendment

1. The terminal disclaimer filed on 7/20/2007 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of patent number 7,047,061 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Based on applicant's amendment, filed 7/02/2007, see page 7 through page 20, of the remarks, with respect to claims 1-15, have been fully considered and are persuasive and upon further consideration in view of the terminal disclaimer, the double patenting rejection, also rejection, of 102(b), 103(a) and rejection of 35 USC 101, for claims 1-15, are hereby withdrawn.

REASONS FOR ALLOWANCE

Claims 1-15 are allowed.

2. The following is an examiner's statement of reasons for allowance.

This invention relates generally to a method for analyzing perfusion images, in particular MR perfusion images, of a human or animal organ.

With respect to claim 1, representing claims 5-6, 9-10 and 13, the closest prior art of record (Declerck and Aiazian) shows comparing single photon emission computed tomography (SPECT) image, having a rest image and a stress image, to provide a classification of the myocardium, but do not teach or suggest, among other things, "a) defining at least one contour of the organ, and (b) establishing at least one perfusion parameter of a region of interest of said organ within a boundary defined by the at least one contour, characterized in that steps (a) and (b) are repeated in a series of iterative steps wherein for each subsequent iterative step the definition of the at least one contour in step (a) is varied, and the series of iterative steps is terminated after reaching an optimal value for the at least one perfusion parameter in step (b)".

These key features in combination with the other features of the claimed invention are neither taught nor suggested by (Declerck and Aiazian) prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
